

Armored Fiber-Optic Distribution Box

DESCRIPTION:

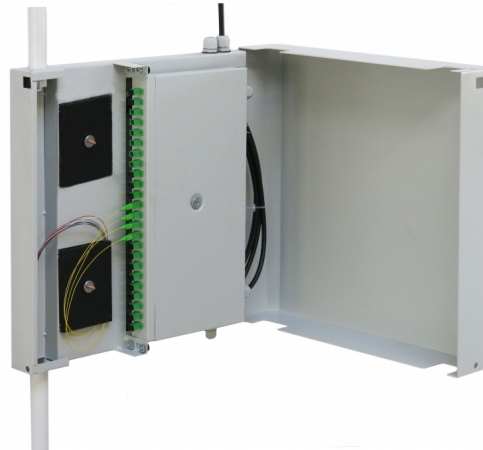

Cabinet designed for wall mounting in places particularly vulnerable to devastation and burglary. Designed to build FTTx networks.

- Provides an anti-burglary mechanical cover for passive elements of fiber optic networks,
- It enables the termination of cables reaching the building from the telecommunications center, vertical cables and the assembly of optical splitters,
- Cabinet equipped with a fixed fiber optic distribution board 19" 1U 24xDX and cable organizers,
- 2 holes $\varnothing 26$ sealed with hermetic glands PG 13.5 and 1 blind hole to knock out $\varnothing 38/50$ on the top and bottom of the cabinet,
- ST version closing by 2 padlocks,
- Z version closing by lock with an individual key code,
- Material: sheet metal body 1.50mm / cover 2.00mm.

Other cable entries can be made on request.
